Portfolio: <https://fajarrafsan.my.id/>

PROFESSIONAL PROFILE

Fresh Graduate in Accounting with more than 3 years of programming bootcamp training funded by a university scholarship, specializing in Frontend Development with React.js, TypeScript, and Tailwind CSS. Experienced in building responsive, component-based interfaces that consume REST APIs — including JWT authentication flows, protected routing, role-conditional dashboards, form validation, and complete loading, empty, and error states. I also design and build the backends behind my own interfaces with Java Spring Boot and Node.js, which means I read API documentation quickly, debug integration issues without waiting on another team, and can discuss contract changes in the backend team's own terms. My Accounting background contributes strong attention to detail and data accuracy — valuable for interfaces that present financial and transactional data, where a rendering mistake is a correctness bug, not a cosmetic one. Currently seeking an entry-level Frontend Developer role in a collaborative product team.

TECHNICAL SKILLS

Core Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite

UI & Interaction: Responsive Design, Component-Based Architecture, Reusable Component Patterns, State Management, Client-Side Routing, Protected Routes, Form Handling & Validation, Loading / Empty / Error States, Framer Motion (animation)

API Integration: REST API Consumption, JWT Authentication Flows & Token Handling, Role-Conditional Rendering (Admin/User), Asynchronous Data Fetching, API Gateway Consumption, Swagger/OpenAPI, Postman

Server-Rendered UI: Thymeleaf with Spring MVC

Backend (Supporting Strength): Java, Spring Boot, Spring Security, Node.js, Express.js, REST API Design, JWT, MySQL, PostgreSQL, Relational Schema Design — I build the APIs my interfaces consume

Tools & Workflow: Git, GitHub, Git Flow, Vite, Vercel Deployment, Unit Testing, JSON, Browser DevTools

Fundamentals: Algorithms, Data Structures, OOP, SOLID, Clean Code, C

Languages: Indonesian (Native), English (Basic)

FEATURED PROJECTS

RoomlyHotel — Hotel Booking Platform

2026

React.js · Tailwind CSS · JWT · REST API · Java Spring Boot · Spring Cloud

Frontend: <https://github.com/fajarrafsan/RoomlyHotel> **Backend:** <https://github.com/fajarrafsan/REST-API-Hotel-Booking>

- Built a responsive booking interface in React.js and Tailwind CSS covering room browsing, availability display, the end-to-end booking flow, and two distinct dashboards for Admin and Guest roles.
- Implemented the client-side JWT authentication flow — token storage and attachment, protected routes, session expiry handling — with role-conditional rendering so Admin and Guest see entirely different navigation and actions from the same codebase.
- Consumed 20+ REST endpoints through a single API Gateway, including image upload with preview, room-type assignment, and real-time availability updates, with explicit loading, empty, and error states on every asynchronous view.
- Built component-based screens with reusable form, table, and modal patterns, keeping layout consistent across desktop and mobile breakpoints with Tailwind CSS utilities.
- Also architected the Spring Cloud microservices backend behind it (Eureka, API Gateway, RabbitMQ, Redis, Payment Gateway) — so the API contract was designed with the client's needs in mind from the start.

AniStream — Media Content Platform

2026

React.js · Tailwind CSS · REST API · JWT · Node.js · Express.js

Demo: <https://anistreasm-fe-nine.vercel.app/> **Frontend:** <https://github.com/fajarrafsan/ANISTREAM-FE> **Backend:** <https://github.com/fajarrafsan/REST-API-ANISTREAM-BE>

- Developed a responsive media browsing interface in React.js and Tailwind CSS, with content listing, detail views, and user profile management, deployed to Vercel.
- Handled authenticated API consumption with JWT, keeping data fetching, session state, and error handling isolated in reusable hooks rather than scattered through components.
- Designed layouts that stay legible from mobile to desktop, with attention to image-heavy content grids and smooth interaction states.
- Also built the Node.js and Express.js REST API and the relational schema behind the interface.

GlowMarket — E-Commerce Platform

2025

React.js · Tailwind CSS · REST API · JWT · Java Spring Boot

Demo: <https://projek-react.vercel.app/> **Frontend:** <https://github.com/fajarrafsan/GLOWMARKET> **Backend:** <https://github.com/fajarrafsan/REST-API-GLOWMARKET>

- Built an intuitive e-commerce storefront and admin panel in React.js and Tailwind CSS, covering product catalog browsing, category filtering, and the full cart workflow.
- Implemented role-based UI (Admin & Customer) on top of JWT authentication, exposing catalog and category management only to authorized users.
- Deployed the frontend to Vercel and connected it to a decoupled Spring Boot REST API that I also designed and built.

SIA — Accounting Information System

2024

Thymeleaf · Spring MVC · Spring Security · Java · MySQL

Demo: <https://sia-sistem-informasi-akuntansi.onrender.com/> **Repository:** https://github.com/fajarrafsan/SIA-SISTEM_INFORMASI_AKUNTANSI

- Built the server-rendered interface for an Accounting Information System using Thymeleaf with Spring MVC, presenting ledger structures and financial records in readable, well-organized views.
- Leveraged a strong Accounting background to make sure the interface reflects accurate double-entry business logic.

BACKEND CAPABILITY — SUPPORTING STRENGTH

- Designed and built the REST API behind every interface in this CV — Java Spring Boot for RoomlyHotel and GlowMarket, Node.js with Express.js for AniStream — including JWT authentication, role-based access control, and full CRUD business logic.
- Working knowledge of relational schema design in MySQL and PostgreSQL, microservices with Spring Cloud (Eureka & API Gateway), asynchronous messaging with RabbitMQ, Redis caching, and Payment Gateway integration.
- Practical value to a frontend team: I understand an API contract from the side that produced it, so I integrate faster and can propose changes the backend team will find reasonable; I can tell from a failing request whether the fault is mine or the server's; and when an endpoint is missing or wrong, I can stub or fix it myself instead of blocking the sprint.

PROFESSIONAL EXPERIENCE

Java Programming Instructor · Universitas Nasional Pasim · Bandung

Sep 2025 – Dec 2025

- Instructed a Java programming bootcamp for 30+ university students, delivering comprehensive modules covering Java Fundamentals, Object-Oriented Programming (OOP), and Web MVC architecture.
- Mentored students through a structured learning path — from conceptual lectures and periodic quizzes to hands-on guidance in building functional web applications using Spring Boot and Thymeleaf.
- Evaluated technical proficiency by assessing students' final projects through comprehensive presentation sessions and code reviews.

Accounting Teaching Assistant · Universitas Nasional Pasim · Bandung

Sep 2024 – Jun 2026

- Assisted professors in facilitating accounting courses, guiding students through complex financial concepts, ledger structuring, and transactional logic.
- Evaluated student assignments and examinations with high attention to detail, ensuring accuracy in financial data processing and calculations.
- Mentored students in understanding fundamental accounting principles, strengthening technical communication and problem-solving skills.

EDUCATION

S1 Akuntansi (Bachelor of Accounting) · Universitas Nasional Pasim · Bandung

2023 – 2026 (Expected)

GPA: 3.64 / 4.00 · Recipient of Full PUB Scholarship 2023–2026

An Accounting background provides a strong foundation in structured thinking, high attention to detail, and data accuracy — directly transferable to building interfaces that present complex data clearly, validate user input rigorously, and keep what the user sees consistent with the underlying data.

ACHIEVEMENTS & RECOGNITION

- Recipient of Full PUB Scholarship — selected through a competitive national scholarship screening process, funding 3+ years of programming bootcamp training alongside the Accounting degree.
- Academic Instructor & Teaching Assistant — entrusted by the university to facilitate Accounting lectures and to mentor 30+ students through a Java programming bootcamp.
- Portfolio: <https://fajarrafsan.my.id/> — showcasing end-to-end projects across backend APIs & microservices, frontend development, and full-stack applications.
