

FAJAR RAFSAN TANJUNG

Frontend Developer — React 19 • TypeScript • Tailwind CSS 4

fajar.rafsan02@gmail.com | +62 812-8619-6886 | Bandung, Indonesia — open to Jakarta relocation, available immediately
linkedin.com/in/fajar-rafsan-80822b394 | github.com/fajarrafsan | Portfolio: fajarrafsan.my.id

27 routes, 316 components, 42 custom hooks in one React 19 console • responsive 320px–1800px+ • 150+ automated tests • live STOMP/WebSocket UI • 8 end-to-end systems, all public on GitHub

PROFESSIONAL SUMMARY

Frontend developer with an Accounting degree background from Universitas Nasional Pasim Bandung. Holds a GPA of 3.64, a full PUB scholarship, and nine programming training certificates. Skilled in **React, TypeScript and Tailwind CSS**. Experienced in building web interfaces from scratch, from admin dashboards and e-commerce storefronts to payment flows. Used to making layouts that hold up from a phone screen to a wide monitor. Also works on the backend, so integration problems get resolved without waiting. Has taught since 2025 as a Java instructor and an Accounting teaching assistant.

TECHNICAL SKILLS

Core — used across multiple shipped systems: React 19, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS 4, Vite, React Router 7, component architecture, custom hooks, Context state, responsive design

Applied in the projects below: REST consumption with Axios interceptors, JWT auth flows & protected routes, role-conditional rendering, STOMP/SockJS real-time, Recharts, Chart.js, Framer Motion, jsPDF / html2canvas, Vitest & Testing Library, i18n (ID/EN), dark/light theming, Git / GitHub, Vercel

Working familiarity: Node Test Runner, Oxcint / Oxfmt, Lucide, Thymeleaf, Browser DevTools

Backend (supporting): Java 21, Spring Boot, Node.js & Express, PostgreSQL, MySQL, Redis, Prisma, Docker, REST API design, JWT — I design and build the APIs my interfaces consume

Spoken Languages: Indonesian (native) • English (technical reading & writing — documentation, specifications, code review)

FEATURED PROJECTS

GlowMarket — Gold Jewellery E-Commerce with a Built-In Accounting Engine 2026

Java 21 • Spring Boot 4 • PostgreSQL • Flyway • Xendit • RajaOngkir • WebSocket/STOMP • Cloudinary • React 19 • Vite 7 • Tailwind 4
Backend: github.com/fajarrafsan/REST-API-GLOWMARKET • Frontend: github.com/fajarrafsan/GLOWMARKET • Demo: projek-react.vercel.app

- Built a storefront and admin console of **27 routes, 316 components and 42 custom hooks** — logic in hooks, components kept presentational.
- Wired the real-time layer over **STOMP/SockJS** with reconnect, heartbeat and re-subscribe on tab focus, driving chat, notifications and presence.
- Shipped a **multi-step checkout** (address → courier → voucher → payment) with Xendit and status polling; the client never computes a financial value.

Roomly — Hotel Booking Platform (Event-Driven Microservices) 2026

Java 21 • Spring Boot 3.5 • Spring Cloud • PostgreSQL 16 • Redis 7 • RabbitMQ • Docker Compose • Midtrans • React 19 • TypeScript
Backend: github.com/fajarrafsan/REST-API-Hotel-Booking • Frontend: github.com/fajarrafsan/RoomlyHotel

- Built a React 19 + TypeScript dashboard of **12+ routes and 30+ reusable components**, split into separate Guest and Admin portals.
- Made it work from **320px phones to 1800px+ ultra-wide** — hamburger nav at the low end, 5-column grids in a capped container at the top.
- Shipped a one-click **bilingual (ID/EN)** interface with Recharts spending analytics and restrained Framer Motion transitions.

TiketKilat — Flight Booking & E-Ticketing Platform

2026

Java 21 · Spring Boot 3.4 · PostgreSQL · Spring Security · Midtrans Snap · iText + ZXing · Apache POI · React 19 · TypeScript 5.9 · Tailwind 4

Backend: github.com/fajarrafsan/TiketKilatBE · Frontend: github.com/fajarrafsan/TiketKilatFE

- Built the booking interface in React 19 + TypeScript 5.9 + Tailwind 4, backed by **76 automated tests**.
- Kept the **Midtrans Snap popup in-page**, polling status every 8 seconds with order-ID recovery so an interrupted payment resumes instead of restarting.
- Wrote an API client with automatic Bearer injection and **silent 401 refresh**, plus separate route guards for USER and ADMIN.

AniStream — Streaming Platform with Dual-Source Catalogue Aggregation

2026

Node.js (ESM) · Express 5 · Prisma 6 · PostgreSQL 15 · Redis 7 · Google OAuth2 · Argon2 · Cloudinary · Jest · React 19 · Vite 8

Demo: anistream-fe-nine.vercel.app · Backend: github.com/fajarrafsan/REST-API-ANISTREAM-BE · Frontend: github.com/fajarrafsan/ANISTREAM-FE

- Built the streaming UI in React 19 + Vite 8: **7 route pages, 20+ custom hooks and 5 context providers**, tested with Vitest.
- Implemented a **multi-server video player** with source switching, plus per-user watch history, wishlist and search history.

ADDITIONAL PROJECTS

ARUNIKA — Specialty Coffee Landing Page — 2026 · HTML5 · CSS3 · Vanilla JavaScript · Vercel | A framework-free landing page with product filtering, 3D tilt card effects and bean-to-cup storytelling, fully responsive from 320px — layout and interaction built without reaching for React. · arunika-livid.vercel.app · github.com/fajarrafsan/ARUNIKA

BACKEND CAPABILITY — SUPPORTING STRENGTH

- I designed and built the API behind every interface in this CV — Spring Boot and Node.js, with JWT auth, role-based access control and payment webhooks. GlowMarket's API alone runs to 82+ endpoints.
- Value to a product team: I read an API spec without hand-holding, and when the API is not ready I can stub or extend it myself rather than wait.

EXPERIENCE

Java Fundamentals Instructor

Sep 2025 – Present

Program Beasiswa PUB · Universitas Nasional Pasim

- Officially appointed to lead a Java fundamentals class of 5 students, from basic logic through to Web MVC architecture, assessed by final project and **code review**.

C Programming Mentor

Sep 2026 – Present

Program Beasiswa PUB · Universitas Nasional Pasim

- Mentor scholarship participants through C fundamentals — pointers, manual memory handling, structs and file I/O.

Accounting Teaching Assistant

Sep 2025 – Aug 2026

Universitas Nasional Pasim

- Ran tutorial classes for Introductory Accounting I & II and Public Sector Accounting across **30 students**; set and marked weekly quizzes — work where an arithmetic slip is a failure, not a rounding difference.

EDUCATION

Bachelor of Accounting (S1 Akuntansi)

2023 – 2026 (Expected)

Universitas Nasional Pasim · Bandung

GPA 3.64 / 4.00 · Full PUB Scholarship recipient (competitive national screening), 2023–2026

CERTIFICATIONS & TRAINING

Nine Certificates of Appreciation from Program Beasiswa PUB (2023–2026) — from Logic and Algorithm through to Advanced Front-End Programming (React), Jul 2026
