Portfolio: <https://fajar-creative-portfolio.fajar-rafsan02.workers.dev>

PROFESSIONAL PROFILE

Fresh Graduate in Accounting with more than two years of programming bootcamp training funded by a university scholarship, specializing in Full-Stack Development with Java Spring Boot and React.js. Experienced in building REST APIs, JWT authentication, relational databases, microservices, and end-to-end web applications. My accounting background has equipped me with strong attention to detail, transactional reasoning, and a focus on data integrity—essential skills for designing precise relational databases and backend business logic. In addition, my experience as a Java Programming Instructor demonstrates strong technical communication and mentoring abilities. Currently seeking an entry-level opportunity as a Backend, Frontend, or Full-Stack Developer to contribute to a collaborative engineering team.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, Spring Cloud (Eureka, API Gateway), Payment Gateway Integration, RabbitMQ, Redis, WebSocket, Node.js, Express.js, REST API, JWT, OOP, MVC, SOLID, Dependency Injection, Exception Handling, Service Layer, Repository Pattern

Frontend: React, TypeScript, JavaScript, HTML5, Tailwind CSS, Thymeleaf, Framer Motion, Vite, Responsive Design

Database: MySQL, PostgreSQL, Hibernate ORM, Relational Schema Design

Tools & Workflow: Git, GitHub, Git Flow, Swagger/OpenAPI, Postman, API Testing, Unit Testing, JSON

Fundamentals: Algorithms, Data Structures, Database Fundamentals, Clean Code, C

Languages: Indonesian (Native), English (Basic)

FEATURED PROJECTS

RoomlyHotel — Platform Hotel Booking Full Stack Microservice

2026

Java · Spring Boot · React.js · Tailwind CSS · Spring Cloud · MySQL · RabbitMQ · Redis ·

JWT

Frontend: <https://github.com/fajarrafsan/RoomlyHotel>

Backend: <https://github.com/fajarrafsan/REST-API-Hotel-Booking>

- Architected and built a scalable full-stack hotel booking platform using a distributed microservices architecture, utilizing Spring Cloud (Eureka & API Gateway) for centralized request routing. Developed 20+ REST API endpoints covering core hotel booking workflows: room inventory management, image upload, room-type assignment, and real-time availability tracking.
- Developed a responsive and interactive frontend user interface using React.js and Tailwind CSS, seamlessly consuming REST APIs through the API Gateway for dynamic room browsing and user dashboard management.
- Implemented secure authentication with JWT and Role-Based Access Control (Admin & Guest), while integrating RabbitMQ for asynchronous notifications and Redis caching to optimize room availability queries.
- Designed isolated relational databases for each microservice and integrated a Payment Gateway to securely process real-time financial transactions with strict data integrity.

AniStream — Full Stack Media Content Platform

2026

Node.js · Express.js · React.js · Tailwind CSS · MySQL · REST API · JWT

Demo: <https://anistream-fe-nine.vercel.app/>

Frontend: <https://github.com/fajarrafsan/ANISTREAM-FE>

Backend: <https://github.com/fajarrafsan/REST-API-ANISTREAM-BE>

- Engineered a decoupled full-stack platform, building secure REST APIs with Node.js and Express.js to handle JWT authentication and core media content management.
- Developed a responsive frontend using React.js and Tailwind CSS, ensuring smooth user interactions and seamless API data consumption.
- Designed an optimized relational database schema to securely manage user profiles, content metadata, and interaction histories.

GlowMarket — Full Stack E-Commerce Platform

2025

Java · Spring Boot · React.js · Tailwind CSS · MySQL · REST API · JWT

Demo: <https://projek-react.vercel.app/>

Frontend: <https://github.com/fajarrafsan/GLOWMARKET>

Backend: <https://github.com/fajarrafsan/REST-API-GLOWMARKET>

- Engineered a full-stack e-commerce application with a decoupled architecture, building secure REST APIs using Java Spring Boot and an intuitive UI using React.js & Tailwind CSS.
- Implemented secure JWT authentication and role-based access control (Admin & Customer) alongside full CRUD operations for product catalogs, category management, and cart workflows.
- Designed an optimized relational database schema to handle transactional data integrity across user profiles, product inventories, and customer order records.

SIA — Accounting Information System

2024

Java · Spring Boot · MySQL · Thymeleaf · Spring Security

Demo: <https://sia-sistem-informasi-akuntansi.onrender.com/>

Repository: https://github.com/fajarrafsan/SIA-SISTEM_INFORMASI_AKUNTANSI

- Developed a comprehensive Accounting Information System (SIA) to digitize financial records, leveraging a strong Accounting background to implement accurate business logic.

PROFESSIONAL EXPERIENCE

Java Programming Instructor · Universitas Nasional Pasim · Bandung

Sep 2025 – Dec 2025

- Instructed a Java programming bootcamp for 30+ university students, delivering comprehensive modules covering Java Fundamentals, Object-Oriented Programming (OOP), and Web MVC architecture.
- Mentored students through a structured learning path—from conceptual lectures and periodic quizzes to hands-on guidance in building functional web applications using Thymeleaf.
- Evaluated technical proficiency by assessing students' final projects through comprehensive presentation sessions and code reviews.

Accounting Teaching Assistant · Universitas Nasional Pasim · Bandung

Sep 2024 – Jun 2026

- Assisted professors in facilitating accounting courses, guiding students through complex financial concepts, ledger structuring, and transactional logic.
- Evaluated student assignments and examinations with high attention to detail, ensuring accuracy in financial data processing and calculations.
- Mentored students in understanding fundamental accounting principles, strengthening technical communication and problem-solving skills.

EDUCATION

S1 Akuntansi (Accounting) · Universitas Nasional Pasim · Bandung

2023 – 2026 (Expected)

GPA: 3.64 / 4.00 · Recipient of Full PUB Scholarship 2023–2026

An Accounting background provides a strong foundation in transactional logic, high attention to detail, and data integrity — directly transferable to designing structured relational databases, building secure backend systems, and implementing precise business logic.

ACHIEVEMENTS & RECOGNITION

- Recipient of Full PUB Scholarship — Selected through a competitive national scholarship screening process.
- Academic Instructor & Teaching Assistant — Entrusted by the university to facilitate Accounting lectures and mentor 30+ students in a Java programming bootcamp.
- Portfolio: <https://fajar-creative-portfolio.fajar-rafsan02.workers.dev> — Showcasing end-to-end projects across backend APIs & microservices, frontend development, and full-stack applications.
